# DIGITAL ACADEMY

EVIDENCE CHAUKE

Matric

During the 6 month period of the **IT: Systems Support learnership programme** at The Digital Academy **Evidence** and her team created a mobile application called **WIZERENTALZ APP**.

Evidence's main responsibilities on the project were to work on the Frontend using HTML, CSS, Angular 2+, and Bootstrap.

PROMO PACK

WIZERENTALZ APP

PROBLEM STATEMENT

Generally, people struggle to find affordable rental accommodation, especially low-income earners. Landlords often need to hike their prices to deal with rental agent fees and platform advertisement costs. How can we use technology to solve these problems?
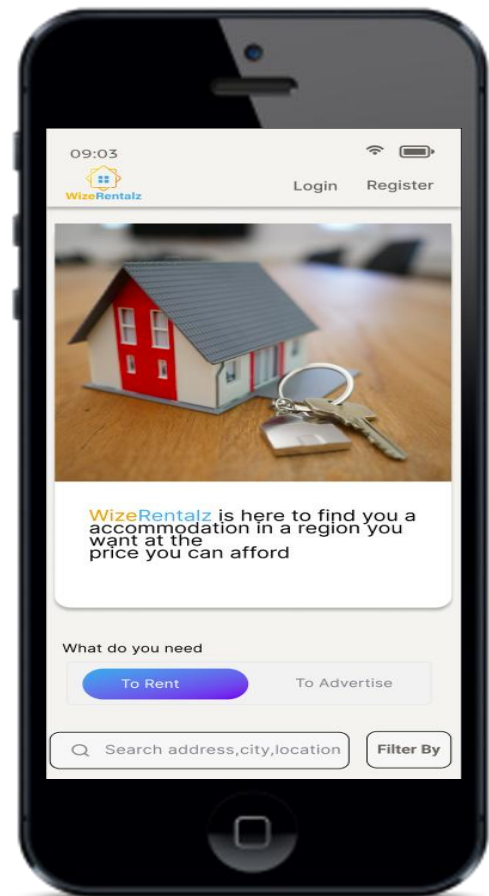

THE SOLUTION

The app helps tenants find accommodation that can be offered at lower rates, as no middlemen are involved, and there are no advertisement costs. Landlords can self-manage all rental processes through the app.

Home page

You will be able to examine rental homes, toggle between landlord and tenant, search for places to rent by location, filter accordingly, access the log in, and registration buttons.
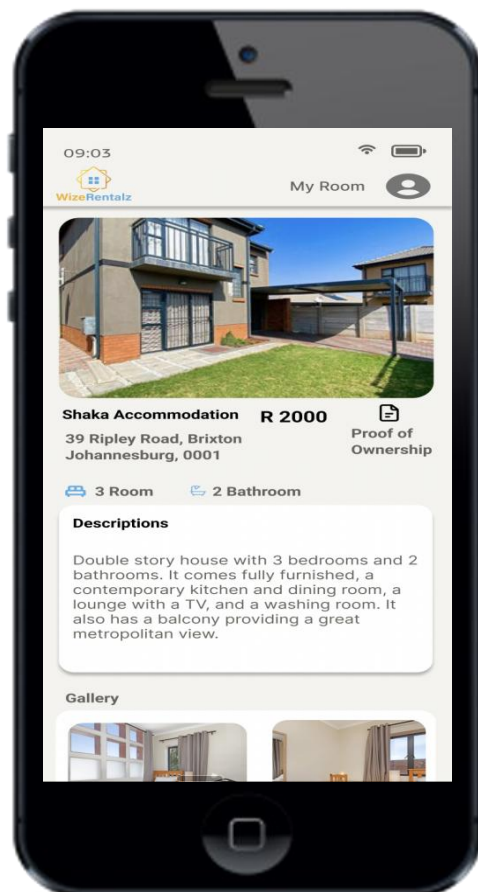

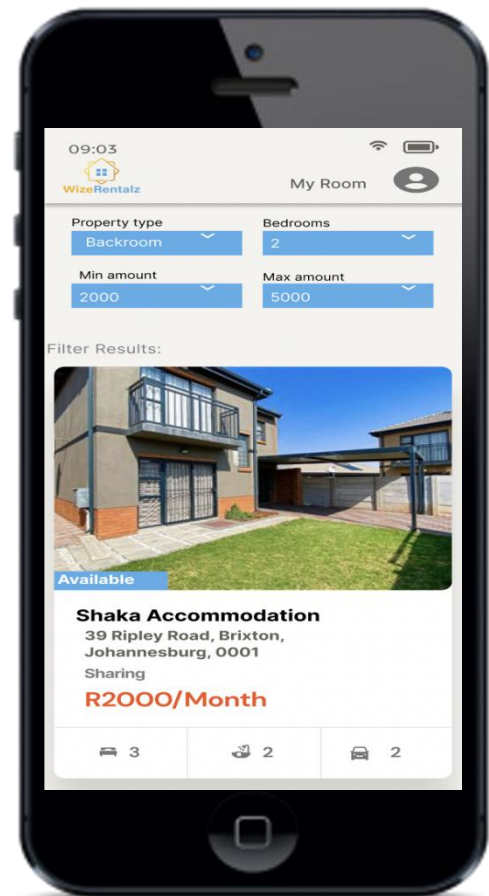

Register/Login

On the Register page, there is a form with a dropdown menu that contains two user-type options: Tenant and Landlord. You can then choose a user type and fill out a registration form. If the user has previously registered, they will log in with their email address and password.

Tenant's page

On the Tenant dashboard page, you will see cards that show properties that are available for rental, you will also see the address and prices of the rooms.

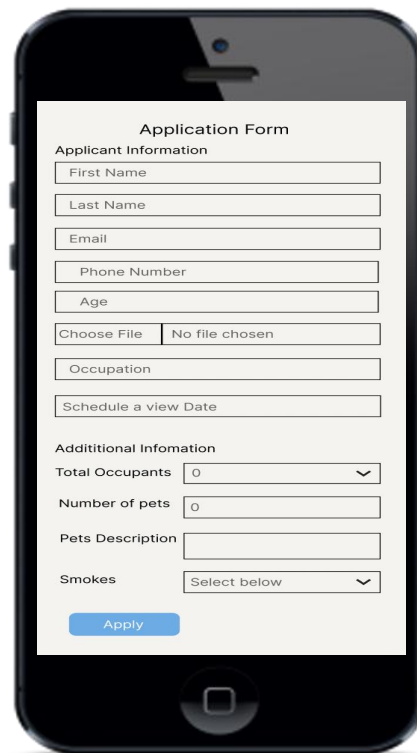

View property

When viewing the property, you will find information about the accommodation, such as its name, address, price, photo, and description, as well as a gallery and the ability to apply for a room.

Tenant application

When applying, you will see a form on the apply page that you must fill out and schedule a time to visit the location.

Landlord's Dashboard

After registering and logging in as a landlord, the dashboard displays the monthly revenue expected from all of your properties, the amount paid and due by tenants thus far, the total number of rooms occupied and unoccupied, and the total number of pending tenants.
